PROFESSIONAL EXPERIENCE

Full Stack Developer with more than 6 years of professional experience and over 10 years of self-taught development experience, specialized in large-scale web and mobile applications. Expert in Angular (AngularJS to v21), React, Ionic, and Node.js, with strong expertise in MySQL and relational database design.

Focused on transforming legacy systems into scalable and maintainable platforms through technology migrations, stack modernization, offline-first architectures, and CI/CD pipeline automation. Capable of taking on technical leadership responsibilities when required, while maintaining a strong hands-on execution mindset.

CORE SKILLS — ANGULAR & LEGACY

Angular / AngularJS

- More than 6 years working with Angular across all major versions: AngularJS, Angular 2–8 (legacy versions), Angular 11 and 13, up to Angular v21.
- Maintenance and evolution of AngularJS applications in high-volume multi-tenant environments (40+ clients, thousands of users).
- Progressive migration from AngularJS to modern Angular versions: dependency analysis, modular refactoring, and hybrid compatibility.
- Implementation of conversational flows and client-configurable component architectures in AngularJS.

Legacy Maintenance & Refactoring

- Deep refactoring of legacy systems, achieving a 60% reduction in codebase size while maintaining full functionality.
- Modularization of monolithic applications, improving long-term maintainability, testability, and extensibility.
- Experience working with undocumented legacy codebases using bottom-up analysis to understand and stabilize systems.
- Migration from Ionic 3 to Ionic 8 in production environments: handling breaking changes, plugin compatibility, and service continuity.

Debugging & Production Issue Resolution

- Parallel resolution of critical production incidents for 40+ clients simultaneously, maintaining sustained availability above 95%.
- Diagnosis and troubleshooting of complex environments including web applications, hybrid mobile apps (Android/iOS), and REST APIs.
- Reduced recurring incidents by 50% through systematic code reviews and delivery process improvements.
- Incident management in coordination with DevOps, QA, and Support teams, focused on fast resolution and root cause documentation.

PROFESSIONAL EXPERIENCE

WS Solutions - Cesla • Full Stack Developer / Tech Lead • Nov 2024 – Feb 2026

- Maintained and evolved 2 web applications, 5 Ionic mobile apps, and 5 APIs serving 40 clients and thousands of users with availability above 95%.
- Led the complete migration from Ionic 3 to Ionic 8, including breaking change analysis, native plugin refactoring, and Android/iOS validation.
- Designed and implemented CI/CD pipelines, reducing deployment time from 1 hour to 5 minutes and increasing release frequency to 4–6 deployments per month.
- Conducted systematic code reviews that reduced production incidents by 50%.
- Coordinated with DevOps, QA, and Support teams to accelerate the resolution of critical production incidents.
- Migrated from Azure Blob Storage to Cloudflare R2 without production impact, reducing traffic costs by 50%.

WS Solutions - Cesla • Full Stack Developer • May 2021 – Nov 2024

- Maintained and evolved legacy Angular/ReactJS applications, delivering 8–10 features per sprint while resolving incidents for 40+ clients.
- Refactored and modularized legacy systems, achieving a 60% reduction in codebase size.
- Participated in technical architecture decisions for both legacy systems and new products, prioritizing scalability and maintainability.
- Maintained 5 hybrid Ionic mobile applications (Android/iOS), including native plugin integration, cross-platform debugging, and environment consistency.
- Implemented offline-first architecture with data synchronization to ensure continuous operation without connectivity.
- Analyzed and debugged undocumented legacy code, reconstructing business logic and stabilizing systems.

Stack: AngularJS · Angular8 · Angular15 · Ionic · React · NodeJS · PHP · Azure Blob Storage · Android · iOS · REST APIs

Apex America - Cognitive • Front-End Developer • Jan 2020 – Mar 2021

- Developed and maintained dynamic AngularJS interfaces for high-volume applications, ensuring consistent UX and cross-browser compatibility.
- Implemented client-configurable conversational flows within a multi-tenant architecture, enabling rapid customization for multiple accounts.
- Participated in code reviews and promoted front-end best practices, improving overall code quality.

Stack: AngularJS · JavaScript · HTML5 · CSS3 · MongoDB · AWS · REST APIs

EDUCATION

Information Systems Analyst · Instituto Cervantes · 2020
